

Storminator™ Barrel — Installation Manual

Storminator™ Barrel — Installation Kit

- 1) Storminator™ Barrel
- 2) Nine (9) bags of treatment media and four (4) bags of pea gravel (metal)
- 3) Pallet
- 4) Leaf diverter
- 5) Filter basket

Installation instructions -

- 1) Place the pallet and empty barrel next to the wall on a level area.
- 2) Remove the filter basket from the top of the barrel.
- 3) Rotate each of the 9 media bags longitudinally 10 times to ensure thorough mixing.
- 4) Empty 3 pea gravel (metal) bags into the Storminator™ Barrel and ensure the perforated pipe is covered with gravel.
- 5) Empty the remaining 9 bags of treatment media in even layers into the Storminator™ Barrel.
- 6) Empty the last pea gravel bag in an even layer on top of the treatment media.
- 7) Replace the filter basket.
- 8) Ensure the provided leaf diverter is installed above the system to avoid detritus such as leaves affecting performance.

Storminator™ Barrel — Maintenance

To ensure performance, routinely check and clean the filter basket, gutters and leaf diverters of any detritus build up.
